

60sec

Questo progetto è un esperimento per realizzare disegni che rappresentano libere visioni legate al mondo dell'architettura e del design, con un unico vincolo: il tempo per la loro realizzazione. Ogni disegno è stato realizzato a mano libera partendo da un foglio A4 bianco e impostando un tempo massimo di sessanta secondi.

This project is an experiment to bring to fruition some designs that represent free visions related to the world of architecture and design - with one loophole: the time to create them. Every design was done free-hand starting with a standard piece of blank white paper and executed in a maximum of 60 seconds.
